EDUCATION

2019–Present; **M.S. in Software Engineering**, Computer Science and Engineering, Sun Yat-sen University
GPA: 93.81/100. | Supervisor: Prof. [Yubao Liu](#)
Research Interests: Sequence-aware recommendation, graph neural network, knowledge graph, data mining
2015–2019; **B.S. in Software Engineering**, Software College, Northeastern University
GPA: 3.66/5. | Advisor: Prof. [Guibing Guo](#)
Postgraduate Candidates Exempt from Admission Exam

PROFESSIONAL EXPERIENCES

2019.09–Present; **Research on Graph-based Sequence-aware Recommendation**, Sun Yat-sen University.
➤ Researched topics include sequential recommendation, session-based recommendation and POI recommendation based on graph neural networks and other deep learning techniques.
➤ Focused on graph-based sequential recommendation mainly. Proposed a framework for sequential recommendation by a self-adaptive graph neural network with future contexts. This work has been accepted by a conference, please refer the “Ongoing publications” section for more details.
➤ Assisted one PhD with research on POI recommendation. I was responsible for programming, drawing pictures and proposing constructive suggestions. This work is being submitted to journal *Neurocomputing*, please refer the “Ongoing publications” section for more details.
➤ Assisted another PhD with research on traffic flow prediction. I was responsible for discussion writing and proposing constructive suggestions. This work has been submitted to conference *IJCAI2022*, please refer the “Ongoing publications” section for more details.

2018.10–2019.06; **Research on Explainable Recommendation**, Northeastern University.
➤ Undergraduate Thesis: *Research and Implementation of Explainable Recommendation Based on Feature Fusion*. Achieved excellent score for the overall work.
➤ Designed a self-transparent and explainable recommendation algorithm by fusing the auto-encoder and tree-based methods to get the cross feature representations.

2018.06–2018.08; **C++ Training Project**, Team leader, Neusoft, Shenyang, China.
➤ Collaborated in a team of a four developers to implement a *Logistics Management System* and a *Highway Intelligent Toll System*.

2018.02–2018.02; **Interdisciplinary Contest in Modeling**, Team leader, Northeastern University.
➤ Led team to investigate relevant literature to research the impact of climate change on state fragility.
➤ Completed a paper called *Analysis of State Fragility Based On the Dynamic to Bi-level Network Model*.

PUBLICATIONS

1. Yansen Zhang, Chenhao Hu, Genan Dai, Weiyang Kong, and Yubao Liu (2021). *Self-Adaptive Graph Neural Networks for Personalized Sequential Recommendation*. In: *ICONIP 2021*. [\[code\]](#).

ONGOING PUBLICATIONS

1. Weiyang Kong, Yansen Zhang, Yubao Liu, and Youming Ge (2022). Adaptive Similarity Graph Neural Networks for Traffic Flow Prediction. *IJCAI*.
2. Genan Dai, Yansen Zhang, Youming Ge, and Yubao Liu (2021). SIMGCN: Similarity-based Graph Convolution Networks for POI Recommendation. *Neurocomputing*.

ONGOING PATENTS

1. Yubao Liu, Yansen Zhang (2021). “A method for sequential recommendation model and sequential recommendation method.” Chinese patent, 202111051076.3. Sun Yat-sen University.

KEY SKILLS

- **Programming:** Python, C/C++, $\text{\LaTeX}$, Markdown, Matlab, R, JavaScript, SQL.
- **Frameworks/Platforms:** PyTorch, Linux, TensorFlow, Keras.
- **Software Tools:** Git, Visio, PhotoShop, MS Office.
- **Languages:** Chinese (native), English (IELTS 6.5).
- **Soft Skills:** Self-motivated, Communication, Time management, Teamwork.
- **Hobbies:** Basketball, Swimming, Mountain climbing, Reading detective fiction.
- **Activities:** Volunteering (6 years), Rope skipping (2nd) .

SELECTED HONOURS AND AWARDS

2021;	Graduate Student Second-class Academic Scholarship,	Sun Yat-sen University.
2020;	Graduate Student First-class Academic Scholarship,	Sun Yat-sen University.
2018;	Interdisciplinary Contest in Modeling (international-level),	Honorable Mention
2017;	First Prize of Mathematical Modeling Contest,	Northeastern University
2017–2018;	Excellent League Member Model (top 5%, departmental),	Northeastern University
2015–2017;	Excellent Students Awards (top 5%, departmental),	Northeastern University
2015–2018;	The Second Prize Scholarship,	Northeastern University
2015–2018;	National Encouragement Scholarship,	Northeastern University
